

## Computer Science

Alfred Morgan

Submitted by Stephen Strenn

Alfred's contributions to the CS Department over the past two years have been truly exceptional. He was a founding member of the Game Dev Club, served as an officer in the CS and Team Programming Clubs, and has tutored in several CS classes. He led one of SBCC's top teams at last fall's International Collegiate Programming Contest and has organized numerous workshops and activities. He always answers the call for volunteers.

Of Alfred's many accomplishments at SBCC, perhaps the greatest has been his impact on fellow students. It has been truly heartwarming to see him support and mentor struggling students, helping them believe in themselves.
