

Mathematics

Lemoni Genosar

Submitted by Elizabeth Chisholm

Lemoni has been an amazing addition to the math department as a student since Summer 2024. She started in PreCalculus, now taking Differential Equations, earning an A in every course with various instructors. Instructors have praised her mathematical maturity, insightfulness, and enthusiasm for mathematics.

Lemoni is also an excellent math tutor. She is a course specific tutor for me and a tutor in the math lab. Students love her. Her ability to explain mathematical concepts in an understandable way is unparalleled. Her patience and kindness are extraordinary. Her enthusiasm is contagious. Her bread superb. Lemoni is one of the kindest, brightest people I've met and I am grateful that she has been a part of the math department.
